This workshop will give an overview on the energy meridians from the perspective of their elemental manifestations, both physically and emotionally. Used for centuries within Traditional Chinese Medicine methods such as acupuncture and chinese medical massage, this profound and practical information can supplement and support bodyworkers and other energy healers in their work.

The first section of the course will be an introduction to the emotional characteristics of each of the Five Elements and how they correspond to the meridians.

The second section will include a hands-on session which will help us locate the meridians and various key acupressure points with discussion on how they can be integrated into a healing sessions.
